FPA No. 11608.006

Dear Ms Coffey:

I have reviewed the above referenced Soil Disturbance Permit application and attached Plot Plan from Jaman Engineering dated October 19, 2020. The Applicant has requested a soil disturbance permit for the disturbance associated with the construction of a driveway and residence which will result in the export of 575 cubic yards of material. I note the following application deficiencies:

1. Certain application sections were not completed: V(d) # of trucks and dates of soil movement. V (g) Location of export, V(f) Name of transporter
2. Morris County Soil Conservation District Permit.

Based on the application is for an export of soil from the site, I recommend that the Soil Disturbance Permit application be deemed complete, with the stipulation the Applicant supply the additional information as described above 30 days prior to start of construction.

Sincerely,

Joseph Norton, LSRP
Project Consultant
